

Bridging the Gap

Architecture and Built Environment Education Programme

E Bulletin - Autumn 2007

Designs on the Greenway

At the beginning of October, 17 Year 7 pupils from Brampton Manor Secondary School were given the low-down on the Olympic Delivery Authority's plans to transform a section of the Greenway, which will be the main walkway through the heart of the Olympic Park, by Kath Markey, ODA project sponsor. Not content with simply repeating the winning roadshow format that has evolved over the course of the year long pilot the team devised new activities which resulted in a fantastic 6m long model. [Find out more.](#)

Junior Developers

Pupils from Roman Road Primary School were treated to a visit by the Mayor of Newham, Sir Robin Wales, during their Bridging the Gap roadshow which involved creating their own 3D map of Newham and models of the Olympic Stadiums to help them understand the scale of change proposed as part of the plans for the 2012 Olympic Games. [Find out more.](#)

Teaching Resources

The Bridging the Gap team have been working with teachers in the participating pilot schools to test resources. In December a teacher at Elmhurst Primary school tested the Stadium Building Kit available to download here. The Kit includes a [step by step](#) guide to hands on model making techniques for Key Stage 2 pupils and [standard components](#) which can be printed on card.

London 2012 Education Programme

Plans for the official London 2012 education programme were [unveiled](#) in December 2007. The domestic education programme for schools will launch in September 2008 and architecture and built environment education will be included under the theme 'regeneration and sustainability'. [Click here](#) to find out how your school can get involved.
